Allowable Subject Matter

1. Claims 1-23 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, Gauthier discloses an antenna comprising a reflector having a reflector surface profile for reflecting a signal comprising a plurality of communication bands; a multi-depth corrugated horn assembly for receiving the signal comprising the plurality of communication bands; a waveguide coupled to the corrugated horn; a first polarizer coupled to the stepped waveguide for separating a first communication band from the plurality of communication bands; a second polarizer coupled to the stepped waveguide for separating a second communication band from the plurality of communication bands; and a third polarizer coupled to the stepped waveguide for separating a third communication band from the plurality of communication bands. Gauthier, however, discloses a tapered waveguide instead of a stepped waveguide as claimed by applicants. The claimed stepped waveguide acts as a short for a low frequency band while allowing signals with higher frequencies to further propagate through the waveguide.

Claims 2-5 are allowed for depending on claim 1.

Reasons for indicating allowable subject matter for claims 6-23 were provided in the previous Office action.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patent 3,696,434 discloses an antenna feed system comprising a stepped waveguide connected to a corrugated horn.
